US Demand by PADD – DTN

Updated: 26-06-14	1A	1B	1C	2	3	4	5	US
vs Last Wk	3.2%	1.6%	-2.6%	-2.6%	-0.4%	-2.2%	1.1%	-0.9%
vs Last Mo	4.9%	4.4%	0.9%	2.1%	1.7%	4.1%	1.3%	2.2%
vs Last Yr	-3.9%	-3.7%	-2.0%	-2.3%	0.9%	1.6%	-0.4%	-1.5%
vs Last Yr MTD	-0.3%	3.7%	-0.9%	-2.5%	1.9%	2.2%	-1.0%	-0.2%
vs Last Yr Week	1.0%	4.1%	-2.6%	-3.5%	2.2%	-0.5%	-1.0%	-0.7%
vs. last year YTD	-3.9%	-3.7%	-2.0%	-2.3%	0.9%	1.6%	-0.4%	-1.5%

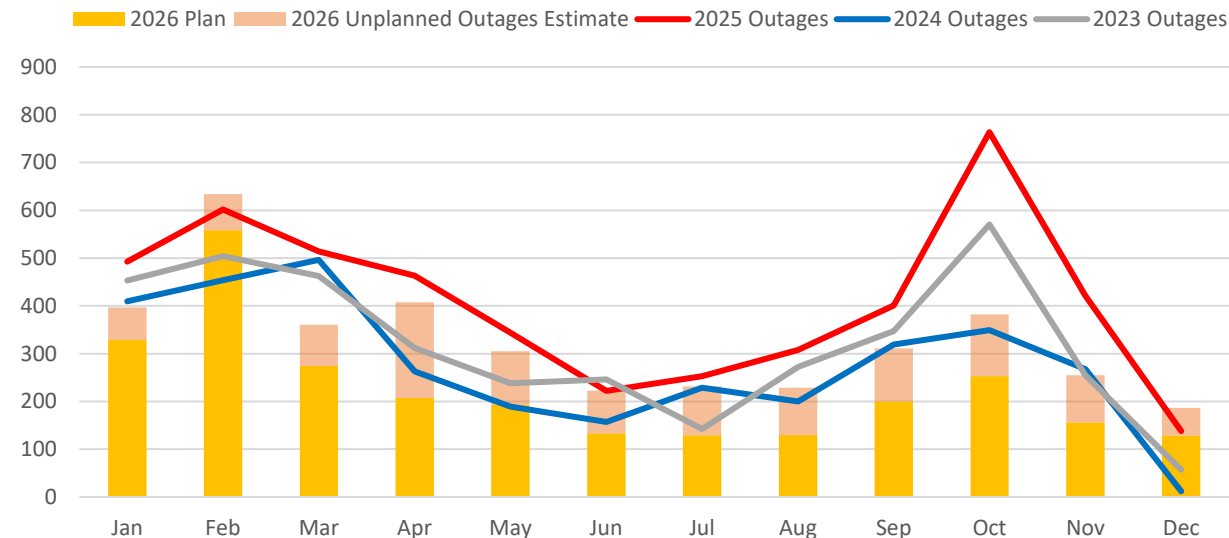

P1 last week demand was **up** 0.8% vs. same week 2025; YTD demand down 3.2% y/y
P2 last week demand **down** 3.5% vs. same week 2025; YTD demand down 2.3% y/y
P3 last week demand **up** 2.2% vs. same week 2025; YTD demand up 0.9% y/y
P5 last week demand **down** 1% vs same week 2025; YTD demand down 0.4% y/y
US Wide last week **down** 0.7% vs. same week 2025; YTD **down** 1.5% y/y

Key takeaway: Demand holding relatively flat vs June '25. PADD 2 remains a watch item with demand decreasing w/w and lower vs the same week last year despite prices decreasing 19cpg w/w.

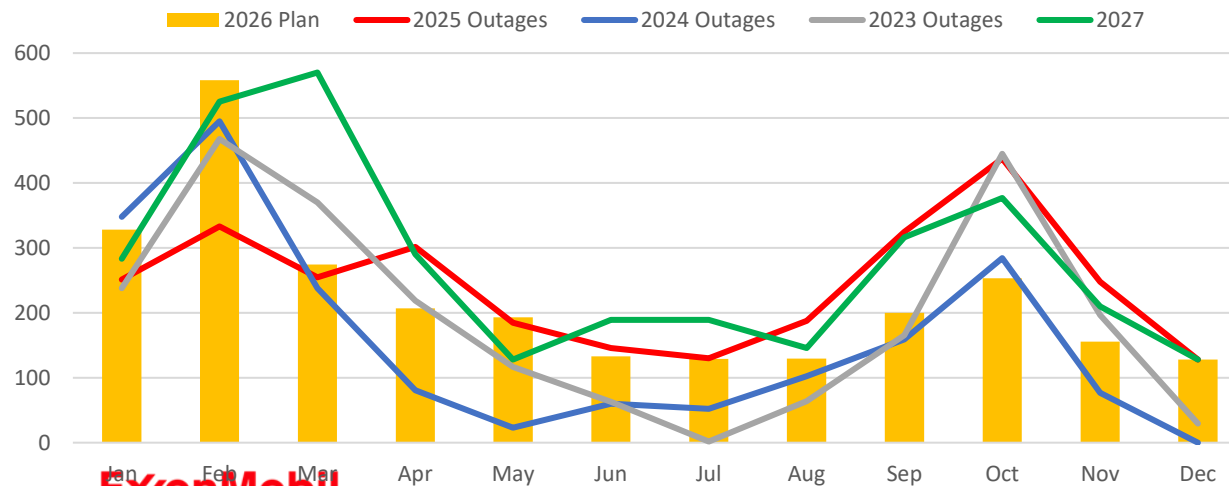

2026 Fall & 2027 Spring TAs - P3

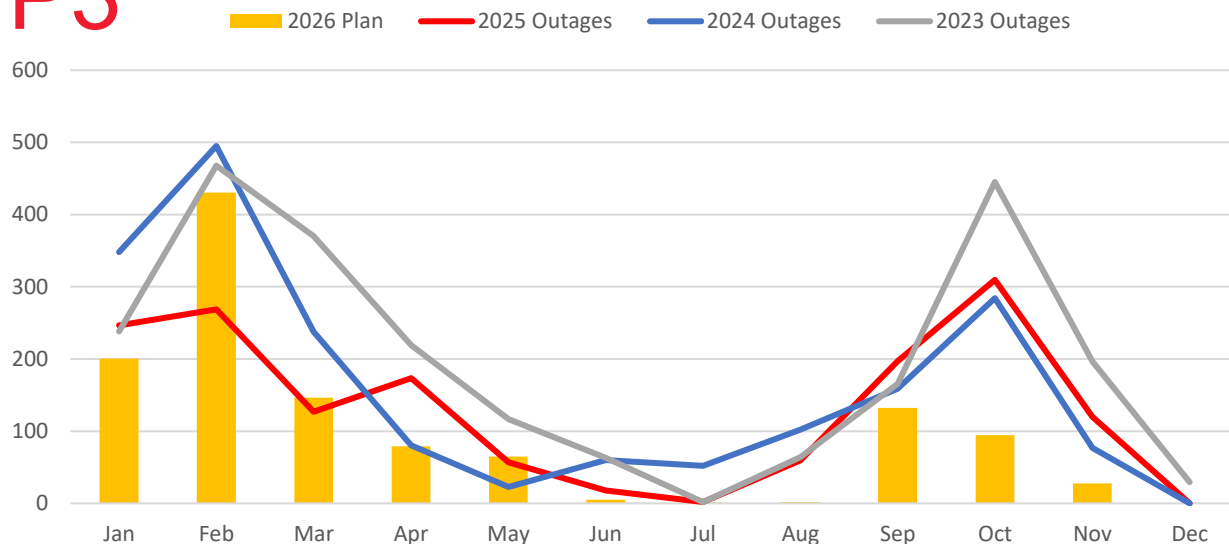

P3 Planned & Unplanned Mogas Offline Prod (kbd)

P3 Planned Mogas Offline Prod (kbd)- Including Lyondell

P3 Planned Mogas Offline Prod (kbd)- Excluding Lyondell

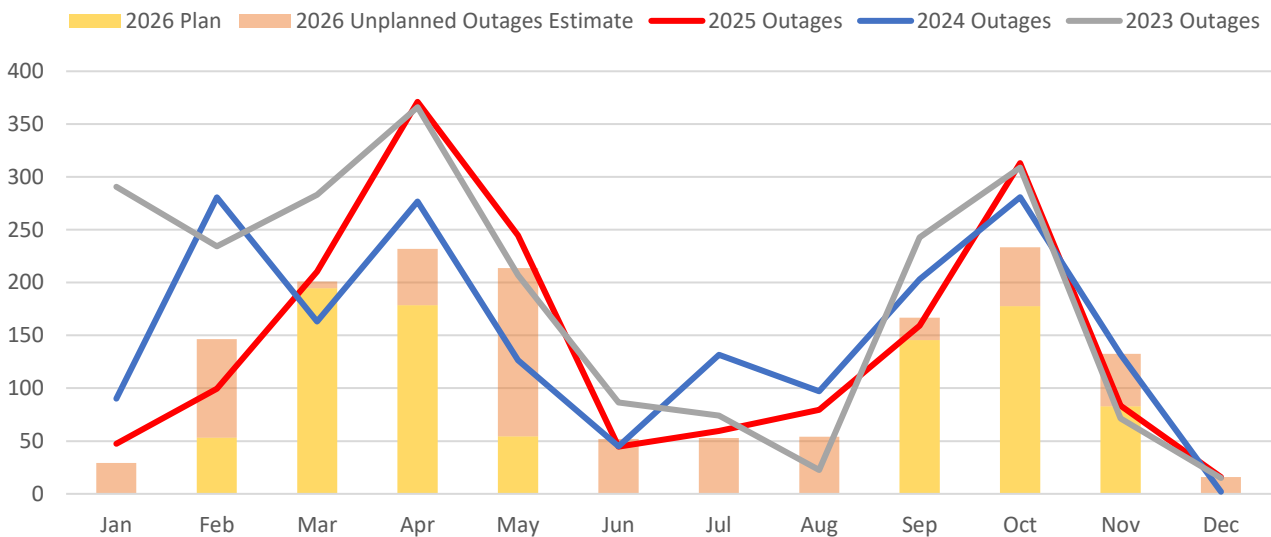

- Fall '26 planned mogas production offline is lower y/y
- Spring '27 planned mogas production offline is higher y/y and peaks in Mar vs Feb
- Had significantly high unplanned outages in Oct '25, which results in overall production being higher in 2026 y/y
- Recent change: Motive PA moving TA from Sep '26 to 2027 ~70KBD of mogas production that will now remain online

2026 Update: P5

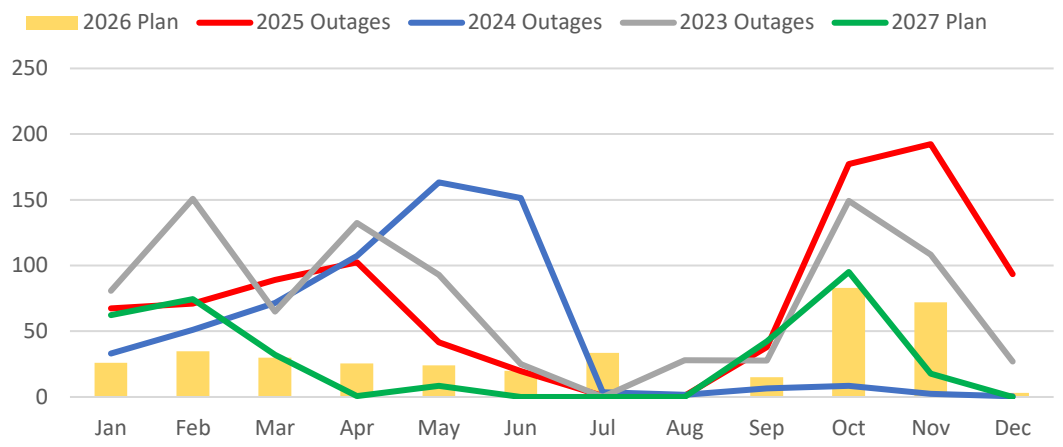

P5 Planned & Unplanned Mogas Offline Prod (kbd)

P5 Planned Mogas Offline Prod (kbd)-Includes P66 LA and Valero Benicia SDs

P5 Planned Mogas Offline Prod (kbd)-Excludes P66 LA and Valero Benicia SDs

- Fall '26 planned outages are lower y/y, excluding P66 LA and Valero Benicia rationalizations
- Spring '27 planned outages are higher y/y with PBF Martinez having a CDU/Ref/HDC/Coker TA Jan-Mar and Chevron El Segundo CDU/Coker TA Jan-Feb
- Including the rationalizations, the planned production offline is higher y/y
- Including estimated unplanned outages, expecting Mogas production offline to be flat y/y

PADD 1

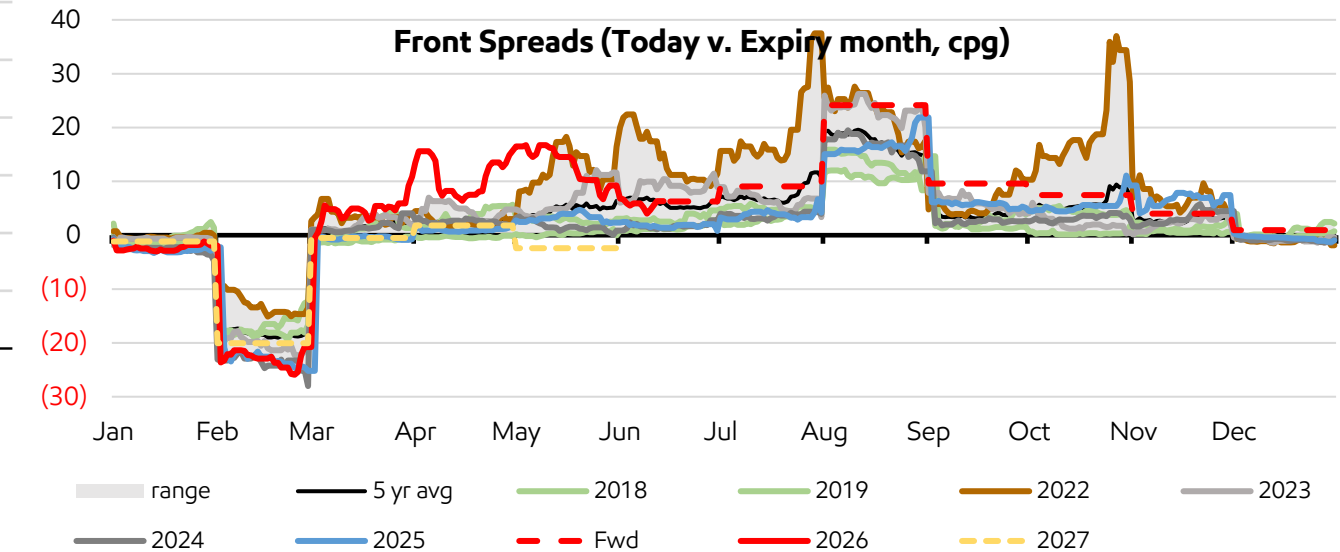

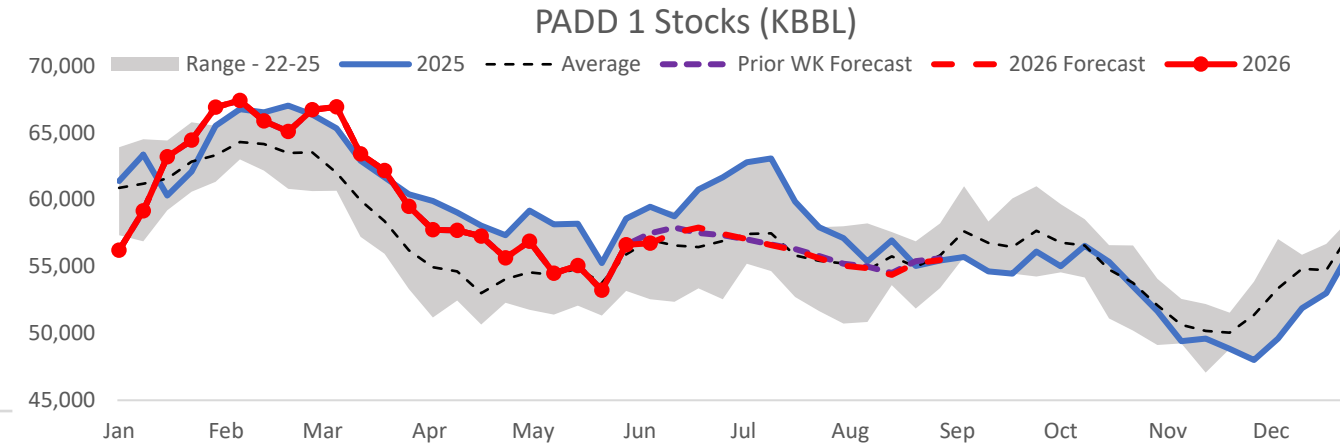

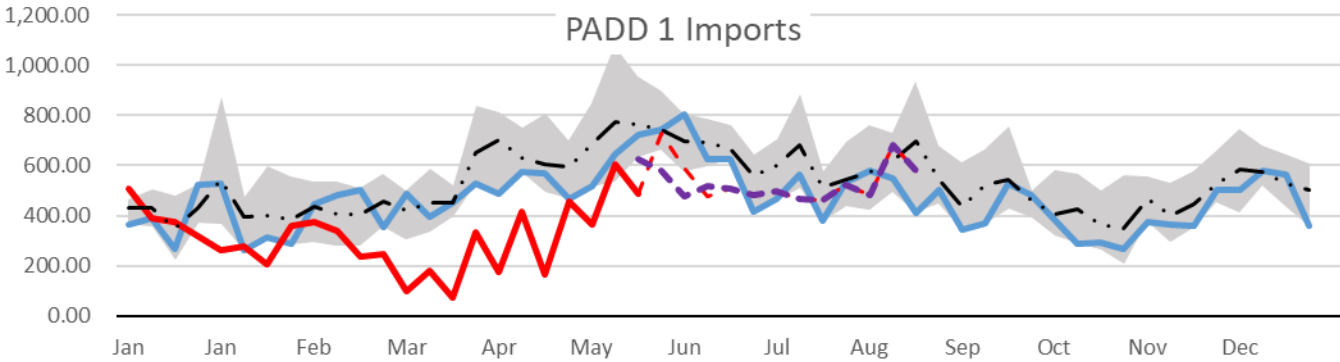

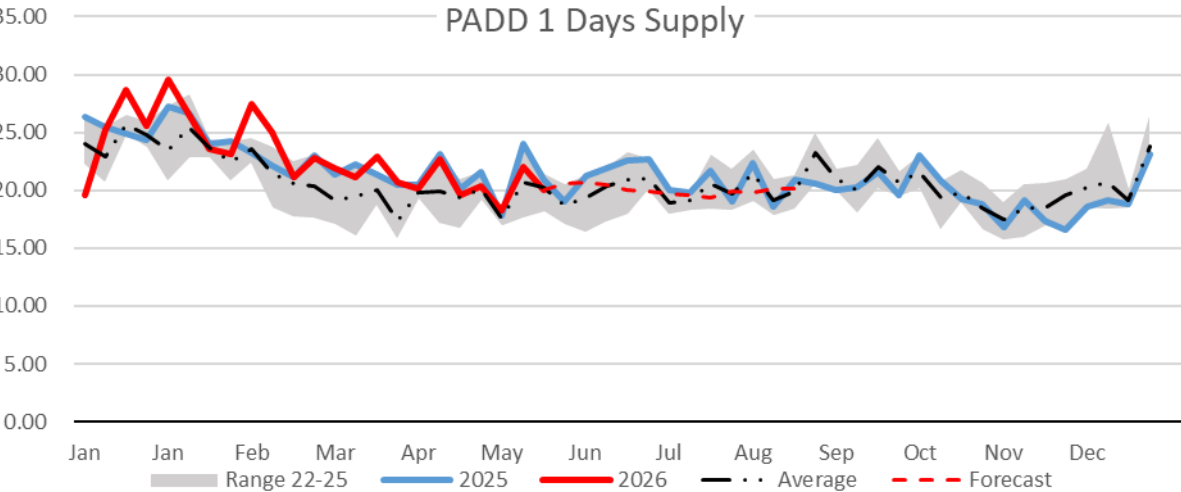

Key takeaway: market feeling well supplied and days of supply expected to stay on the upper side of the 5-yr band. Fixtures from P1 imports slowing down 2H June from the highs in May but remains stronger than Apr. Refiner and blender arbs closed. Vessels arriving starting to 2-port discharge indicating high inventory.

Stocks:

- P1 stocks built 0.1MB which was below expectations due imports printing 138kbd lower than indicated from ship tracking however, this was partially offset by production printing 90kbd higher than the top of the five-year band.
- Expecting PADD 1 imports to peak for w.e. 6/12 and supported through June
- Expecting build of 0.8MB with imports increasing w/w

Ship Tracking from 6/10

W/e	PADD 1			
	Last	Today	Δ	EIA Estimate
6/5/26	600	565	-35	565
6/12/26	690	730	40	730
6/19/26	390	540	150	590

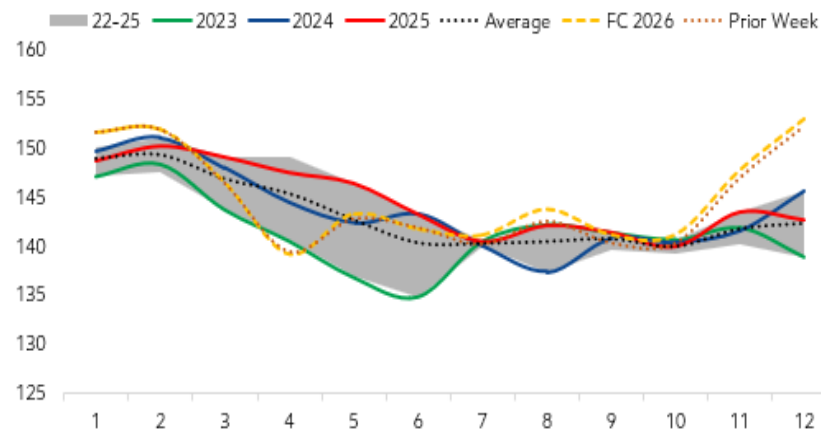

Refinery arbs marginally open. Blender arbs remains closed from ARA

Europe Update

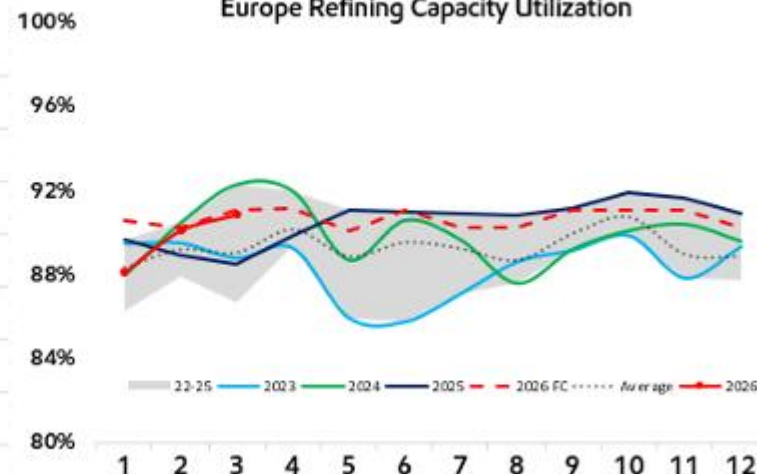

Europe Gasoline Inventories (MB)

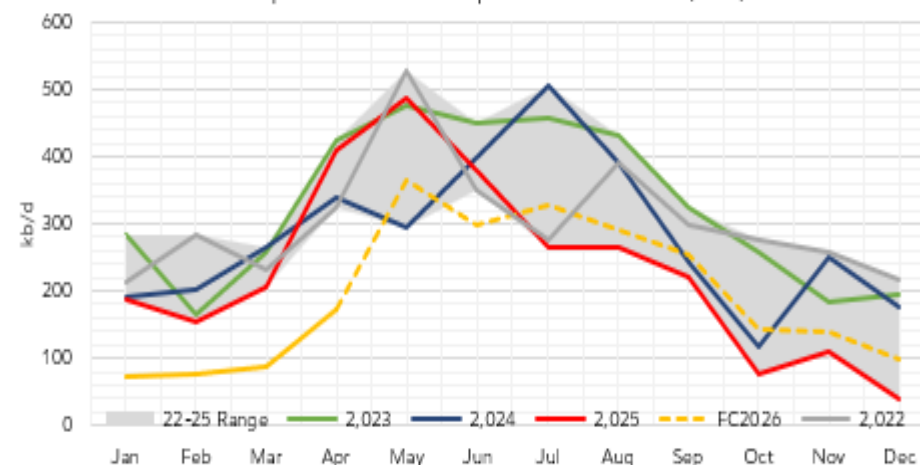

Europe Gasoline Demand (kbd)

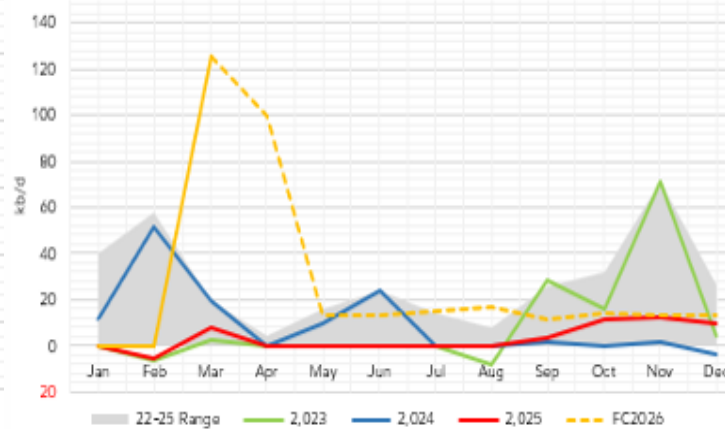

Europe Refining Capacity Utilization

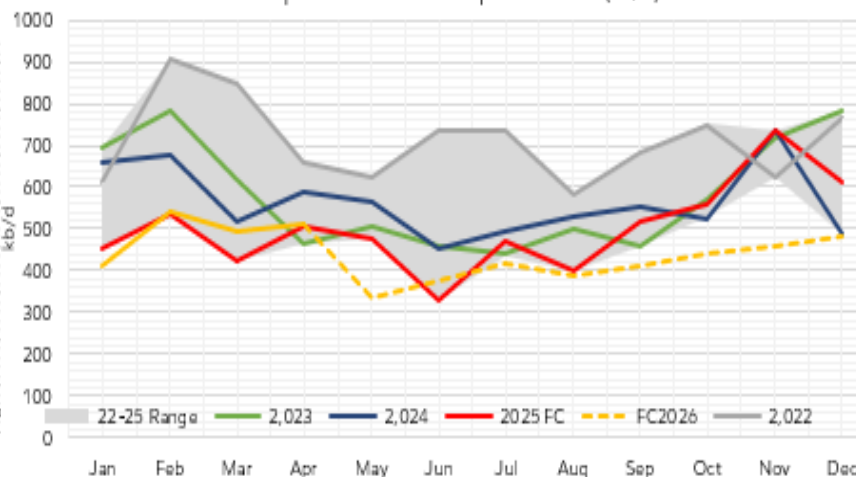

European Net Gasoline Exports - Atlantic Coast (kb/d)

European Net Gasoline Exports - Asia Pacific (kb/d)

European Net Gasoline Exports - Africa (kb/d)

Key take away: EU demand recovered w/w with retail prices softening recently, but demand still lagging in demand center (Germany and France) Demand forecast at +4% y/y pre-Iran war, now at +3% y/y. Strong margins incentivizing Tas to be pushed out (Total Antwerp pushed their TA Sep '26 to Sep '28). Continue SE Africa pull softness and limited pull from AP capping upside

PADD 3

Key takeaway: Closed arb to NYH weighing on basis and LS. P5 not pulling significantly out of USGC yet. Expecting some strength into June/July as P5 starts to pull to maintain days of supply (~100KBD). Significant aromatics flow from AP landing in late June/July

Stocks:

- Stocks drew 1.5MB due to exports increasing 170kdb, although partially offset by implied demand printing 80kdb below expectations w/w
- Expecting stocks to remain flat/draw 0.4MB w/w

Supply Outlook:

- Motiva Port Arthur Sep TA was delayed to '27. 70kdb mogas impacts (+2MB of mogas)
- PBF – Chalmette Reformer SD 5/8 outage expected up to 6-12 weeks
- P66 – Sweeny FCC SD 3/28 extended outage to 6/19
- VGO weakening strengths FCC margins and supports continued mogas production (VGO slide)

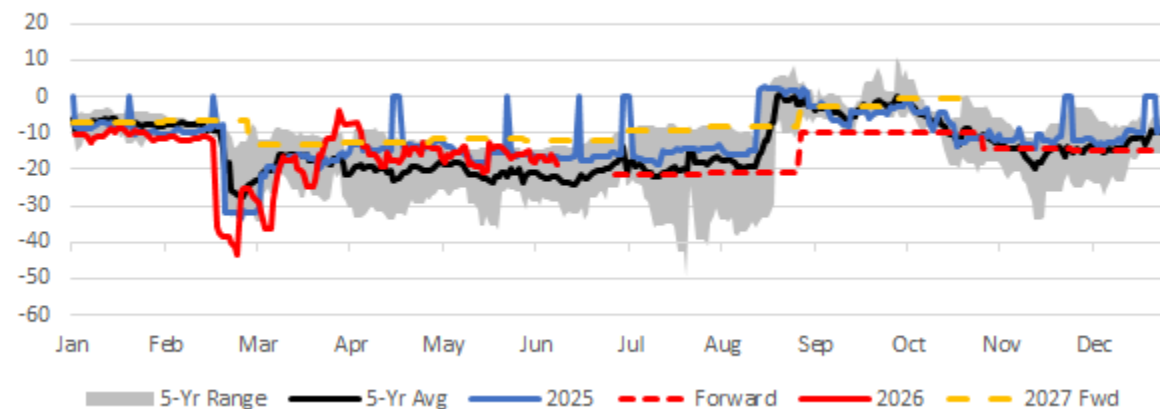

Pipelines/Exports

- Exports continued to show strength last week - PMI and Colombia coming out for prompt cargoes
- LatAm demand now -70kdb y/y. Applied -50kdb of exports from USGC in the balance
- CPL L1 trading at -3.0cpg

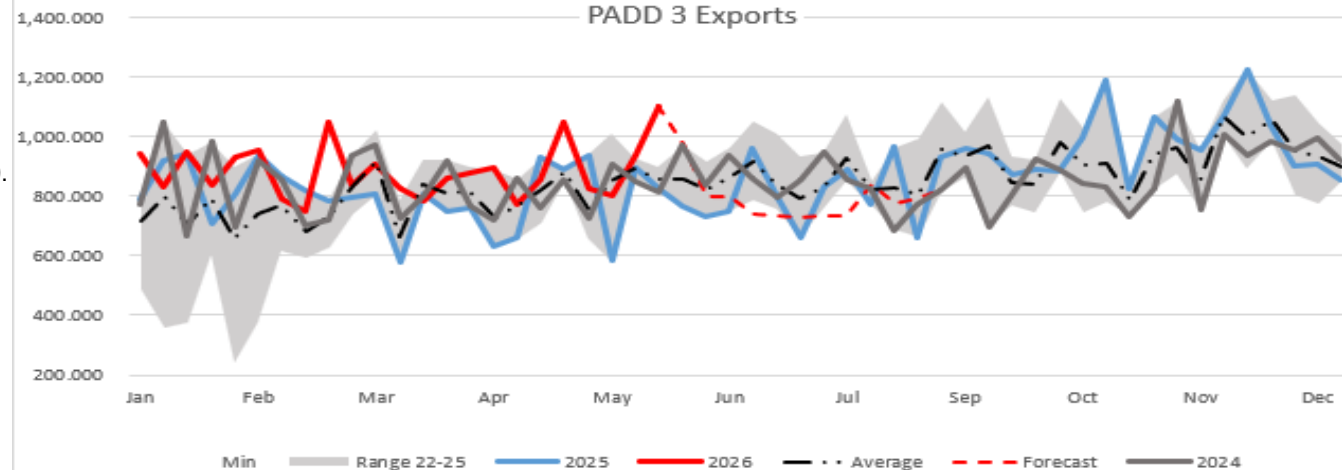

Aromatics imports:

- MTM New York – from Korea ETA 6/22 – Benzene
- MTM Big Apple – from Taiwan ETA 7/4 – PX
- FPMC 31 – from Korea ETA 7/16 – MX
- Clynelsh – from Korea ETA 6/16 – Toluene
- Marlin Aventurine – from Korea ETA 6/17 – Toluene

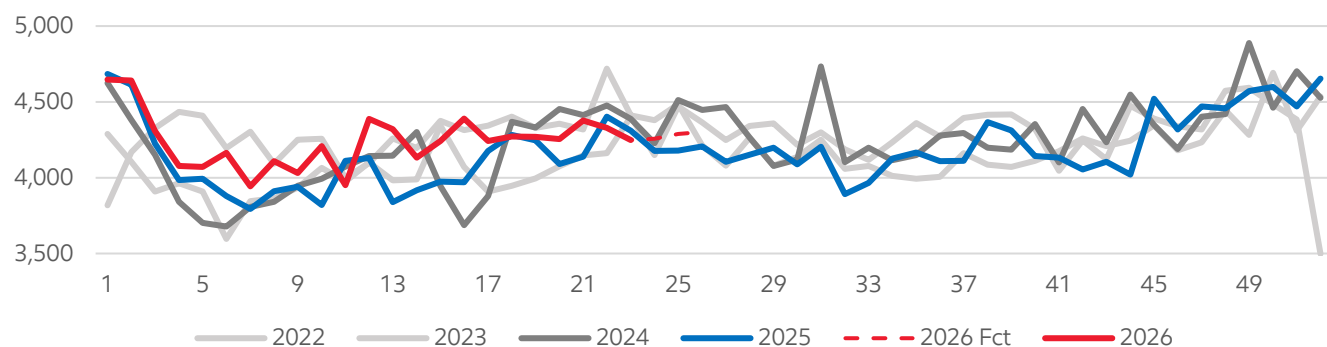

USGC A Basis (cpg)

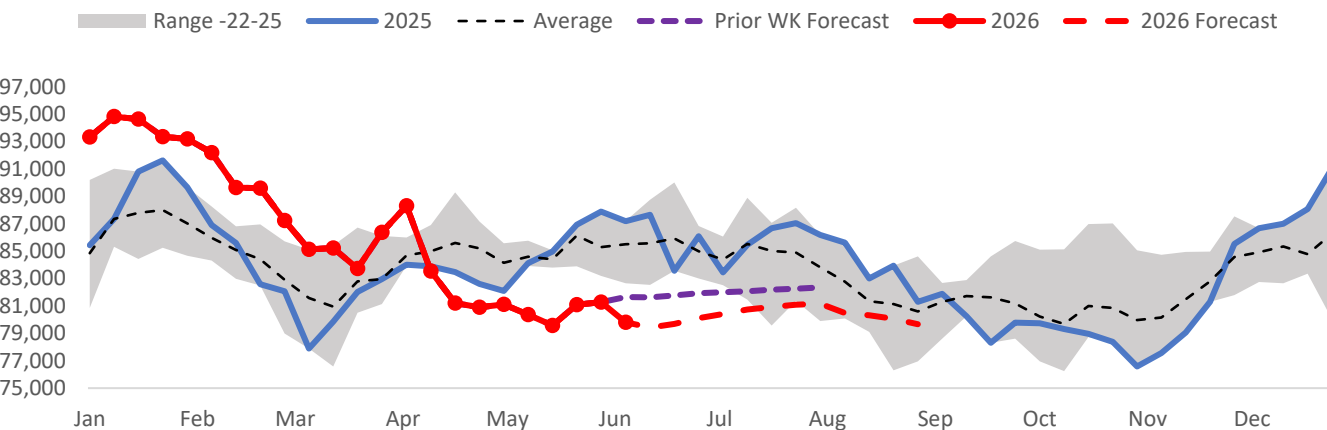

PADD 3 Exports

Production (kdb)

PADD 3 Stocks (KBBL)

PADD 5

Key takeaway: Limited imports from Asia/India in July. Expecting P5 to have to pull from P3 to remain above 18 days of supply.

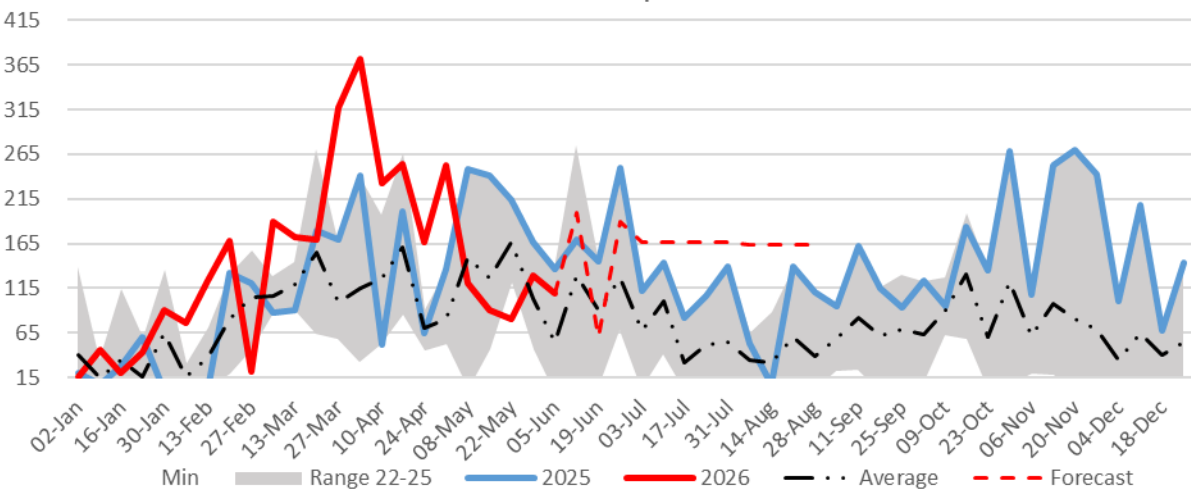

Stocks:

- Stocks built 0.3MB with production increasing w/w and implied demand decreasing w/w – however inventories are still below 4-year band
- Stocks expected to build 0.2MB

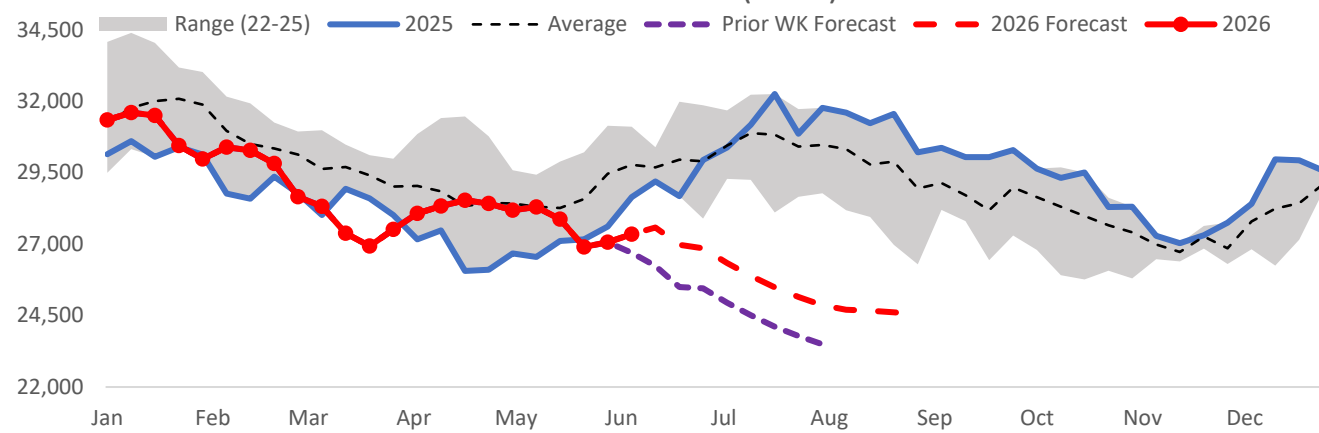

Imports:

- Assuming June imports to be 120kbd based on ship tracking; down w/w after Atlantic Sunshine diverted to WC Mexico
 - Originally estimating 85kbd of imports from Asia, recent ship tracking showing 100kbd, following additional vessels diverting to USWC.
- July forecast assumes **50kbd imports from Asia** and **117kbd from P3**. Sensitivity on Asia imports coming in flat or higher than May.
- Ship tracking indicating soft July imports at 30kbd. Continue to assume we see more fixtures from P3 that would land end of July.

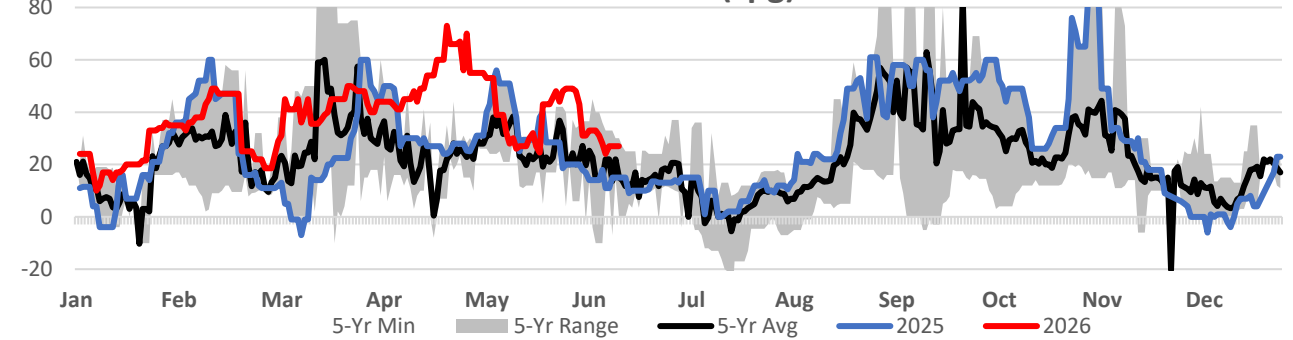

PADD 5 Imports

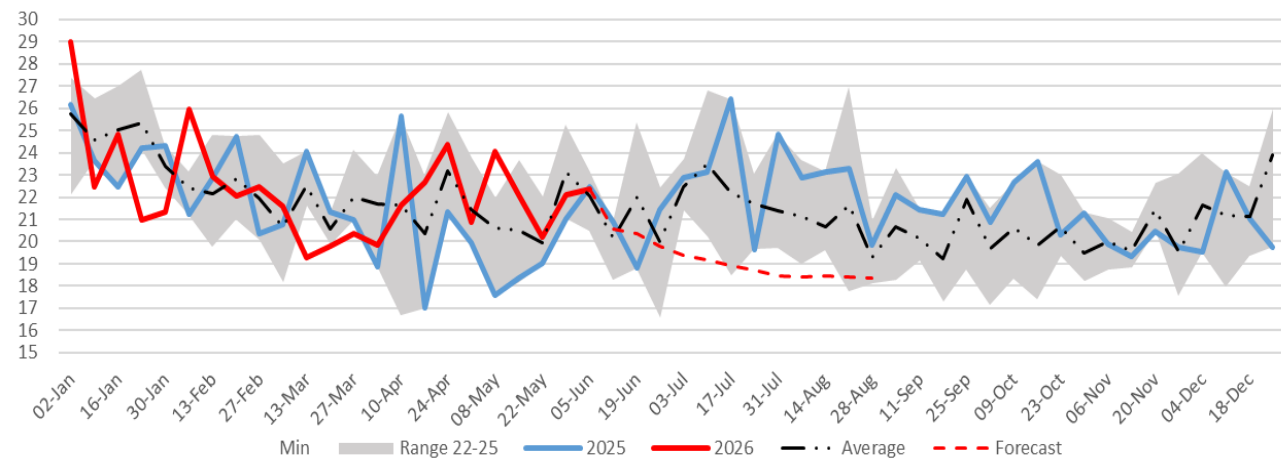

PADD 5 Stocks (KBBL)

LA CARBOB (cpg)

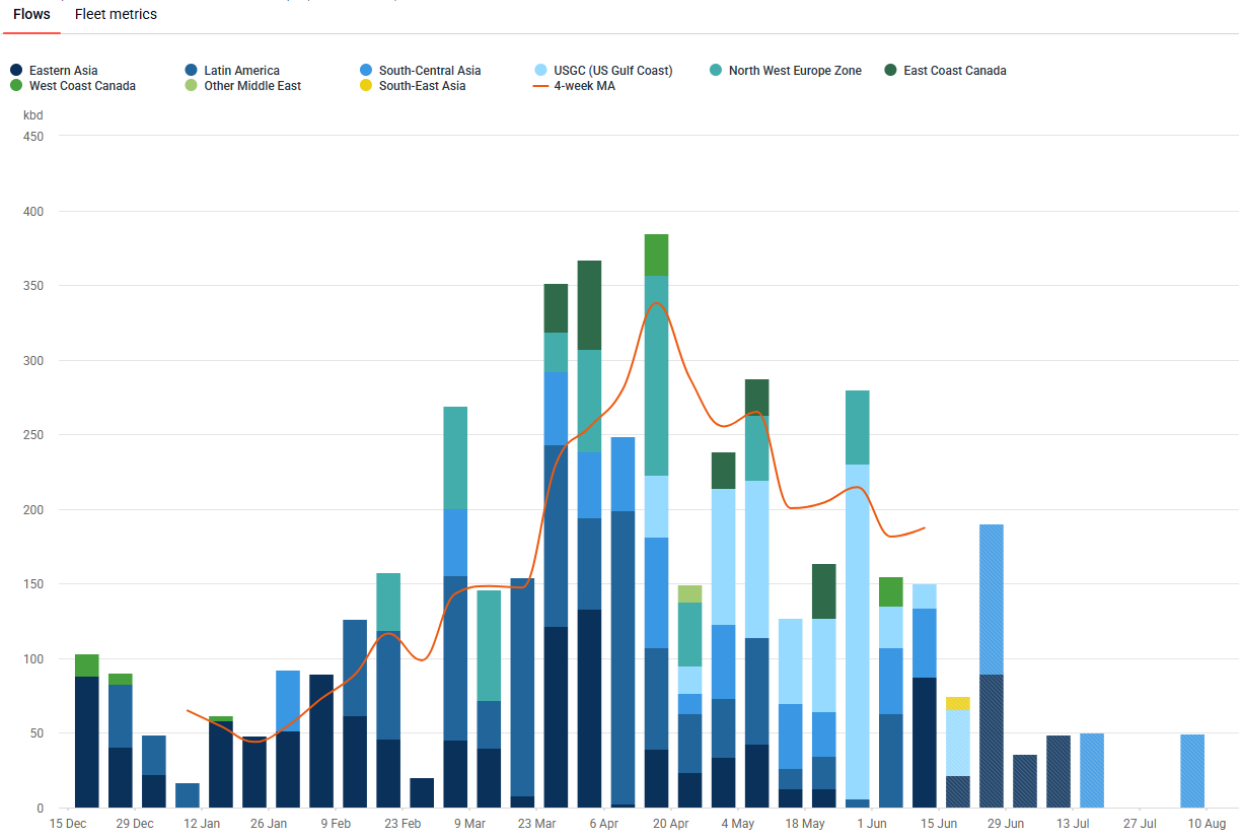

PADD 5 Days Supply

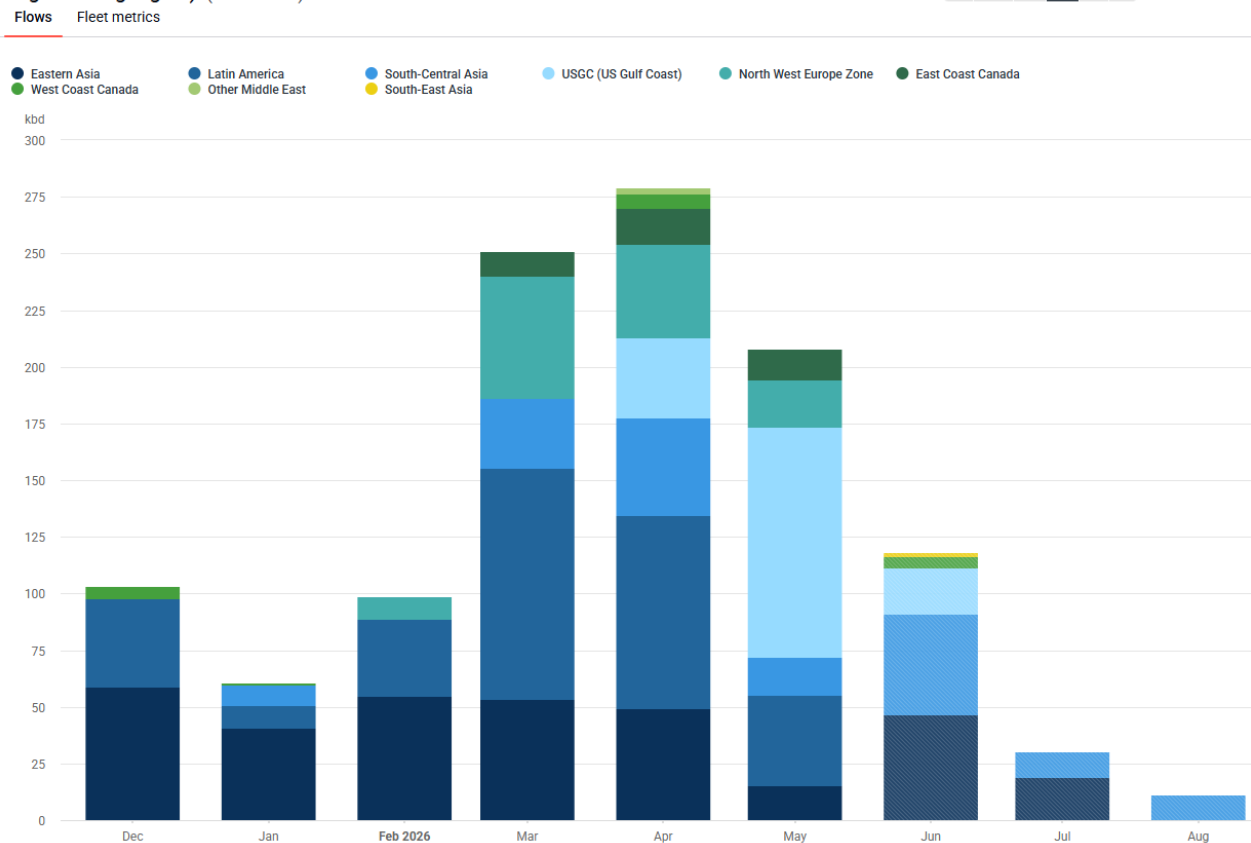

PADD 5 Imports from AP/India showing slowdown for July landing

PADD 5 end-of-week (preliminary) imports (Alkylate, Gasoline Blendstock, Reformate (& 1 others), by origin trading region) (6 months)

PADD 5 monthly imports (Alkylate, Gasoline Blendstock, Reformate (& 1 others), by origin trading region) (6 months)

EoS Gasoline Balance

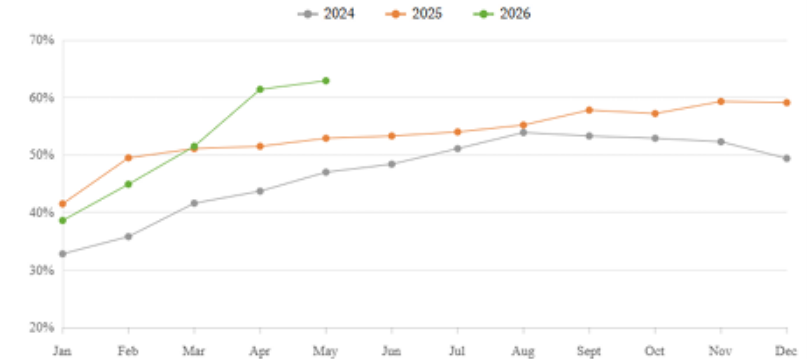

• Demand:

- EoS demand in June/July ~980kbd lower y/y (~10% y/y)
- Chinese demand exacerbated by heavy rainfall in South China; NEV retail sales hit another record high of 63%
- AP-PADD5 flows remains muted, tracking 30kbd for June loaders thus far
- India's May stats – showing 3% demand growth vs the expected ~7% - Implies ~30kbd demand destruction (ex-ethanol basis) with price hikes/austerity measures implemented mid May

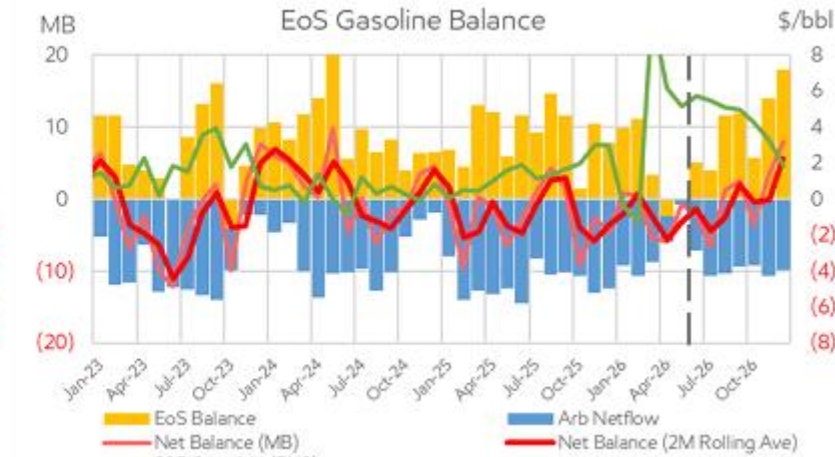

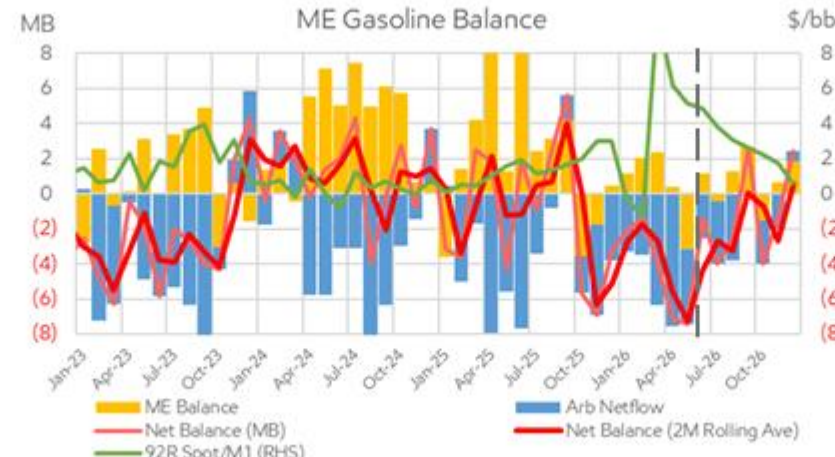

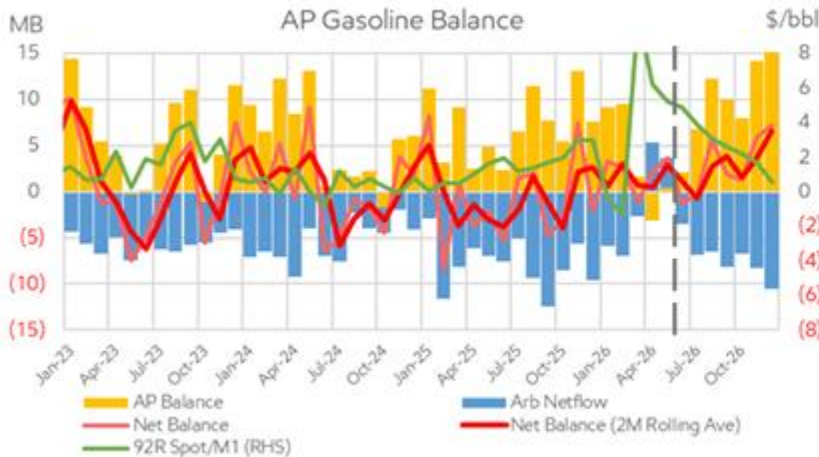

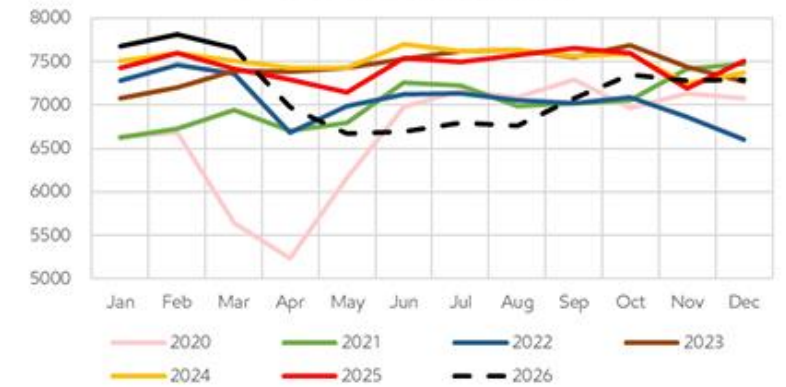

• Supply:

- Jizan/Rabigh flow to AP stays muted, no June loader heading East thus far
- Chinese govt issued the 2nd Chinese export quota batch (13 mil tons) - No impact so long as Chinese exports restrictions remain in place but signals Chinese readiness to export once restrictions are lifted
- RAPID restarted May but RCC remains at ~60% utilization. Balikpapan RCC starts up June but at 40% utilization, ramps to 65% by year end

China passenger NEV penetration at retail

AP Gasoline Consumption, KBD

PADD 2

Key takeaway: Unplanned outages led P2 to be at bottom of band. BP buying gasoline in the market has helped support gasoline in the region. Explorer arb marginally open; expecting P2 to have to pull bbl from P3 through the summer to stay above min historic inventory.

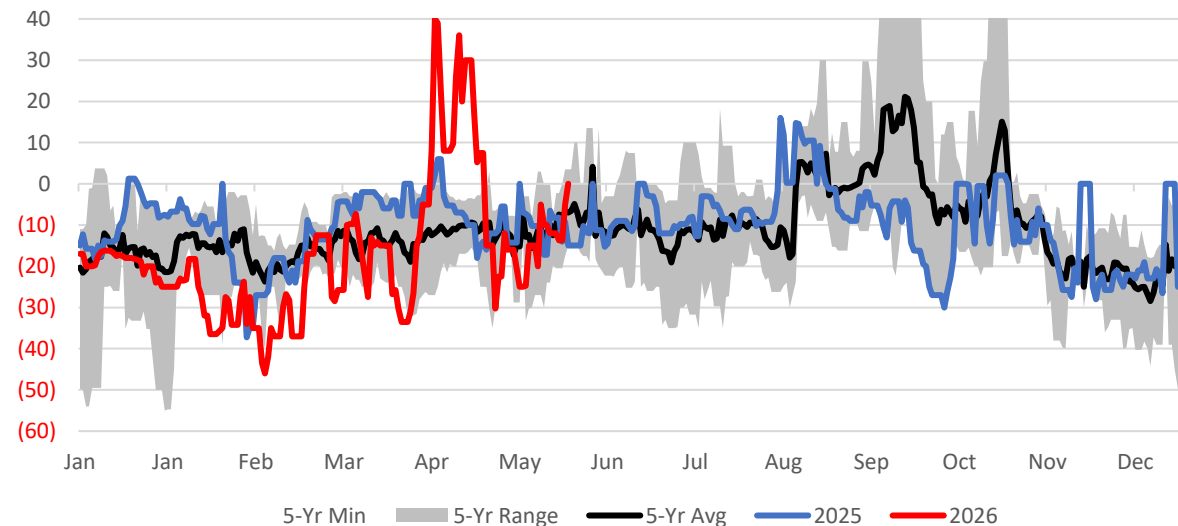

Stocks:

- Stocks built 1 MB w/w, with interPADD imports increasing w/w and EIA reporting a 6.5% decrease in demand YoY contrary to DTN reporting a decrease of 1.4%
- Expecting stocks to stay flat w/w

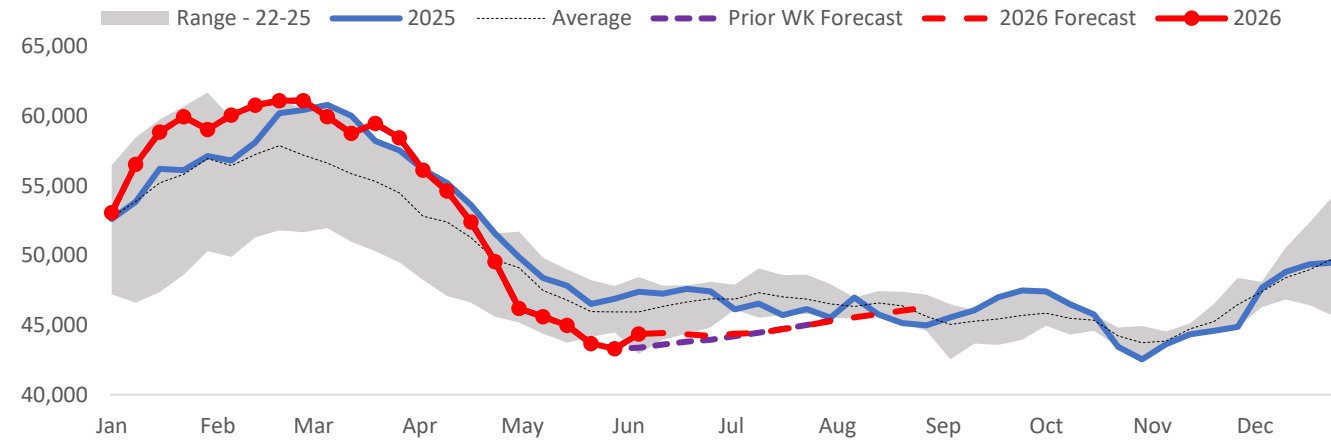

Supply:

- Canada Crude: Kearn, Fort Hills, Syncrude cut back production and Cenovus FM due to heavy rain and power outage. Not expecting to impact runs in PADD 2.
- XOM Joliet SU 5/8, but has remained cutback (leak on CHD and then the FCC). Expected to increase rate this week

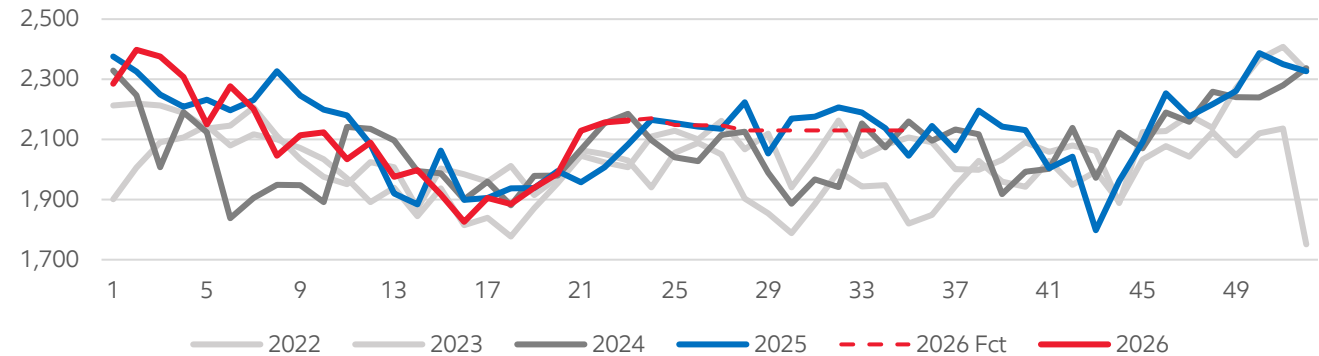

Chicago CBOB Swap Basis (cpg)

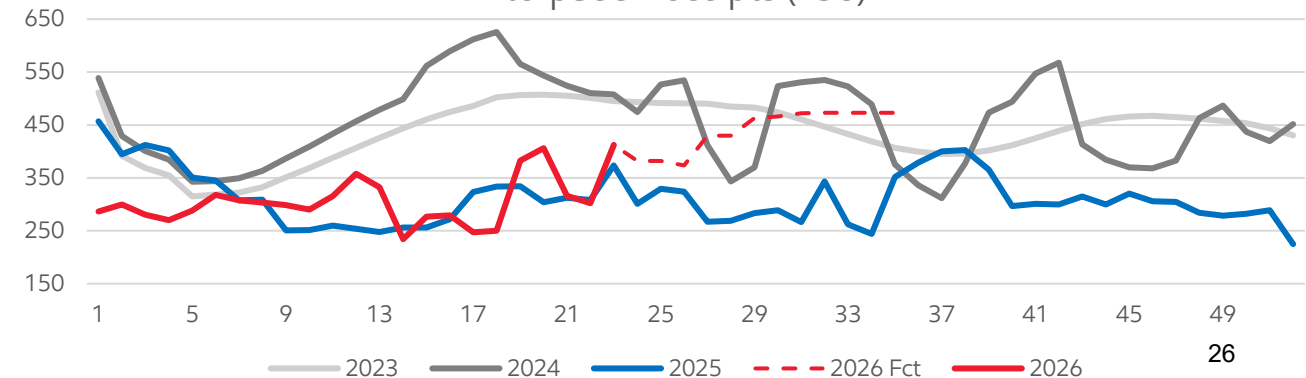

PADD 2 Stocks (KBBL)

Production (kbd)

Interpadd Receipts (kbd)

Outage List

Major updates:

- XOM Joliet started to raise rate but remained cutback (~23kbd mogas impact)
- Calcasieu completed SU 6/11
- PBF Chalmette Reformer assuming down for 9 weeks after fire
- Marathon Galveston Bay Reformer SD 6/4 and expecting SU this week
